TELEPSYCH ED COVERAGE

24/7 psychiatric care when your ED needs it most.

Every emergency department needs reliable, expert on-call support. Tribal Health telepsych services provide a safety net for your frontline ED team, delivering continuous coverage, cost savings, and top-tier mental health support.

Empowering your staff. Eliminating delays.

- Pay for services only when they're needed - instead of paying for an on-staff professional.
- Treat "ED boarders" and free up beds for medical emergencies.
- Connect patients to clinicians trained in Indigenous care delivery.
- Rapid crisis triage assesses ER patients - who don't need to wait hours to be seen.
- ED staff can quickly connect to Board-certified psychiatrists or advanced practice registered nurses to reduce risk of improper discharge and improve facility safety.

Every second matters in emergency care. Bring on-demand psychiatric care to your patients and relief to your ED team.

Contact us for a complimentary consultation on how telepsych services can support your emergency department.
