TELEPSYCHIATRY

TELEPSYCH ON-CALL CARE

Cultural connection. Clinical expertise.

When behavioral healthcare isn't available in Native American and rural communities, Tribal Health telepsych services can bridge the gap. Transportation hurdles and staff shortages become irrelevant as our Board-certified psychiatrists and advanced practice registered nurses advance meet patients where they are - providing compassionate mental health support.

Quality behavioral care - continuous, convenient, and discreet.

- Patients see dedicated clinicians trained in Indigenous care delivery.
- Virtual visits eliminate transportation challenges for patients, reducing no-shows.
- Patients enjoy discreet visits from the privacy of home, preventing worries over stigma.
- Extensive therapy options include Medical Assisted Treatment and CBT (Cognitive Behavioral Therapy) and more.
- Pay for services only when they're needed - instead of paying for a full-time behavioral health professional.

Bring culturally connected mental health care to your community. Let's talk about how Tribal Health can design a telepsych service package tailored to your needs.
